EXCEPTIONAL DENTAL ACADEMY

FINAL 2026 COHORT

ADVANCED AESTHETIC REHABILITATION

Full mouth rehabilitation, made predictable.

Dr Aodhan Docherty & Dr Kamran Ashraf · 2 days hands-on · 16 CPD hours

MELBOURNE Sat 7 & Sun 8 Nov 2026 Le Méridien · 9:00am – 5:00pm

OVERVIEW

> **You can do the dentistry. The complex cases are what's missing.**

Occlusal philosophies, vertical dimension, deprogramming and advanced preparation, distilled into a structured rehabilitation system that removes the guesswork from complex cases. Two days, heavily hands-on, 16 hours of CPD.

Dr Aodhan Docherty
EDA CO-FOUNDER
University of Sydney graduate with honours and a University Medal, and an alumnus of the Kois Academy. Graduate Diploma in Oral Implants and co-author of "Practical Procedures in Implant Dentistry".

Dr Kamran Ashraf
EDA CO-FOUNDER
Sydney-based clinician and educator with advanced postgraduate training in prosthodontics and periodontics, and a Fellow of the Royal College of Surgeons of Edinburgh.

Nine things you'll be able to do on Monday

01 Comprehensive rehabilitation diagnosis
Occlusion, vertical dimension, wear patterns, muscle involvement and functional risk.

02 Occlusal philosophies, demystified
Kois, Spear, Dawson, LVI and Pankey compared, and when to apply each.

03 Centric relation & centric occlusion
Identify, verify and record CR and CO, and transition CO=MIP.

04 Neuromuscular deprogramming
Leaf gauges, Lucia jigs, Kois and anterior deprogrammers, and when to use each.

05 Vertical dimension management
When to increase VDO and how to do so safely, predictably and accurately.

06 Orthotic therapy & stabilisation
Design, place and adjust orthotics, and transition them into CO=MIP.

07 Advanced preparation strategies
Upper and lower arch rehab preps, including BOPT and vertical protocols.

08 Equilibration & scheme design
Stable, reproducible mutually protected and balanced bilateral schemes.

09 Restorative sequencing & execution
Clear sequencing from diagnosis through to definitive delivery.

DAY ONE

Diagnosis → Occlusion → Deprogramming

9:00 AM

Comprehensive Rehabilitation Diagnosis

A structured approach to complex cases: occlusion, vertical dimension, wear patterns, muscle involvement and functional risk.

Morning

Occlusal Philosophies, Demystified

Kois, Spear, Dawson, LVI and Pankey compared. How centric relation definitions differ across schools, and how that changes clinical decisions.

Afternoon

CR & CO, Hands-On

Identifying, verifying and recording centric relation and centric occlusion, and transitioning CO=MIP.

Late PM

Neuromuscular Deprogramming, Hands-On

Leaf gauges, Lucia jigs, Kois deprogrammers and anterior deprogrammers. When to use each and how to interpret patient response.

THE EDA REHABILITATION WORKFLOW

One repeatable chairside sequence

The same order, every case, so complex dentistry stops feeling like guesswork.

DAY TWO

Vertical Dimension → Preparation → Delivery

9:00 AM	**Vertical Dimension Management** When increasing VDO is indicated and how to do it safely. Recording, verifying and transferring planned changes with calipers and reproducible reference points.
Morning	**Orthotic Therapy & Stabilisation** Designing, placing and adjusting orthotics, transitioning into CO=MIP, and using them as diagnostic and therapeutic tools.
Afternoon	**Advanced Preparation, Hands-On** Upper and lower arch preparation for rehabilitation cases, including advanced lower arch, BOPT and vertical preparation protocols.
Late PM	**Equilibration, Sequencing & Case Review** Selective equilibration and stable occlusal schemes, restorative sequencing, then case-based discussion and open Q&A.

WHAT HANDS-ON MEANS HERE

You'll work the occlusion with your hands

01
Identify & record CR and CO
Find centric relation, verify it, record it, and understand how to transition CO=MIP.

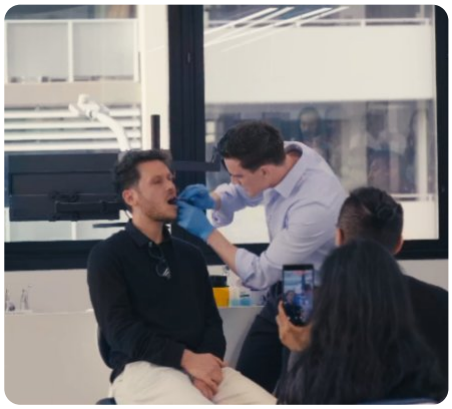

02
Deprogramming techniques
Leaf gauges, Lucia jigs, Kois and anterior deprogrammers, and when each is indicated.

03
Orthotics & vertical dimension
Stabilising orthotics, transitioning into CO=MIP, and recording VDO changes with calipers.

04
Preparation & equilibration
Advanced upper and lower arch preparation, then selective equilibration of occlusal schemes.

FEEDBACK YOU CAN'T MANUFACTURE

★★★★★

From stuck to a starting point

"I've had patients come in far too complex for me, I didn't know where to start. They make it so easy."

Dr Peter Wu · AAR, Sydney

★★★★★

Occlusion, backed by evidence

"There's a lot of confusion and different schools of thought around occlusion, I wanted the research that underpins the decisions we make."

Dr Selena Liu · AAR, Sydney

★★★★★

A protocol you can follow

"We came away with a recipe for how to approach these cases, from diagnostics to temporising, prepping and delivering the finals."

Dr Emanuel Wollstein · AAR, Sydney

STOP REFERRING OUT THE COMPLEX CASES.

WHO IT'S FOR

Experienced clinicians managing, or wanting to manage, complex restorative cases. If worn dentitions, collapsed bites and vertical dimension questions currently get referred out, this course is built to bring them back in-house with a defensible system.

DATE & VENUE

Melbourne · Sat 7 & Sun 8 November 2026
Le Méridien Melbourne

TIME

9:00am – 5:00pm both days · 16 hours CPD

INVESTMENT

A$3,454.54 + GST per attendee, incl. materials

WHAT'S INCLUDED

- ✓ Two full days of hands-on instruction
- ✓ All typodonts & consumables
- ✓ Small-cohort faculty ratio
- ✓ AAR course booklet & protocols
- ✓ Lunch & refreshments both days
- ✓ Certificate of attendance
- ✓ 16 hours of CPD
- ✓ Post-course faculty support

Full refund more than 30 days before the course date, 50% within 30 days, no refund within 15 days.
