THE IMPLANT ROADMAP 101

The complete single-implant workflow, case selection to final crown

Presented by Dr David Norcross

with co-educators Dr Aodhan Docherty & Dr Kamran Ashraf

Sydney 27th–29th November 2026

PROUDLY SPONSORED BY

OVERVIEW

"My experience with the All-on-4® treatment concept began over 10 years ago. Since then, full arch implant treatment has become an obsession."

The Implant Roadmap 101 is a three-day, fully hands-on programme that takes general dentists through one complete single-implant case: assessment and case selection, CBCT planning, flap design, placement, and the restorative sequence through to the delivered crown. Every day pairs lectures with workshop time on pig jaws and surgical models.

The course is led by Dr David Norcross, implant surgeon at Perth Dental Implant Centre and a Nobel Biocare Key Opinion Leader with over 16 years in implant dentistry. He is joined on the floor by co-educators Dr Aodhan Docherty and Dr Kamran Ashraf.

Dr David Norcross

Dr Aodhan Docherty EDA CO-FOUNDER

Grad Dip Clin Dent in Oral Implants (USyd). Previous examiner of the postgraduate Oral Implant Diploma at the University of Sydney and co-author of "Practical Procedures in Implant Dentistry".

Dr Kamran Ashraf EDA CO-FOUNDER

Sydney clinician with advanced postgraduate training in prosthodontics and periodontics. Fellow of the Royal College of Surgeons of Edinburgh and the Pierre Fauchard Academy.

What will I learn from this course?

Through lectures and hands-on workshops, the following topics are covered:

- Patient assessment & ideal first cases
- Understanding the restorative endpoint
- Timing, extraction & CBCT planning
- Flap design & tissue handling
- Suturing & socket preservation
- Surgical preparation & implant selection
- Osteotomy & primary stability
- Freehand & guided placement
- Soft tissue profile & emergence
- Impressions, abutments & restoration
- Complications & maintenance
- Bringing implants into your practice

DAY ONE - FRIDAY 27TH NOVEMBER

3:15pm	Skills practice	Workshop	• Hands-on: restorative workflow & case-planning workshops
4:30pm	Feedback & closure	Discussion	• Final comments, questions & feedback • Certificates

WHAT DELEGATES SAY

★★★★★

"Previous programs have been more step-by-step protocols, literature references and anatomy, screenshots...a little bit dry... whereas, I found Dave has complemented previous programs I've done, because it was more 'what can I do on the next case, clinically'... Phenomenal level of preparation and expertise by Dave, he really pours his heart and soul into the program."

Dr Johan Weemaes

Full-Arching Residency delegate

★★★★★

"I can see the amount of effort Dave has put into customising the course into what we, the participants, really wanted to know by asking us beforehand what questions we wanted answering. It's just been so personalised and honestly, worth every single penny."

Dr Sindhu Mohan Kumar

Full-Arching Residency delegate

★★★★★

"The mentors have already thought through everything that will go wrong or right. That thought process made a lot of sense and I want to bring it back home."

Wan Ting

EDA delegate · Singapore

READY TO PLACE YOUR FIRST IMPLANT?

WHO IT'S FOR

General dentists placing their first implant. No implant experience needed. Also suits clinicians who restore implants and want the surgical side.

DATE

Friday 27th – Sunday 29th November 2026

VENUE

Australasian College of Dental Practitioners
Chatswood, Sydney
